Bandung

A final-year Information Technology student at Telkom University with a passion for web and mobile application development. Experienced in building end-to-end web applications, from responsive and user-friendly interfaces to backend development and API integration. Strong team collaboration skills and an enthusiasm for learning new technologies to improve application quality.

Work Experiences

Microsoft - Bandung

Nov 2023 - Dec 2023

Student Representative

I serve as a Microsoft Representative student representative at Telkom University with the main task of studying technology products from Microsoft and introducing their products to the entire campus environment.

- Represented Microsoft in campus educational initiatives by introducing Microsoft technologies to students and increasing digital literacy through workshops and training programs.
- Built a strong understanding of the Microsoft ecosystem (Microsoft 365, Power BI, Azure) and developed interactive dashboards using Power BI to deliver data-driven insights.
- Explored Microsoft Azure services including cloud computing, databases, AI/ML, and IoT to support digital innovation and strengthen cloud-based solution development skills.

PT PLN (Persero) - Bandung

Apr 2025 - Jul 2025

Network Administrator Internship

Supported network infrastructure maintenance to ensure reliable IT operations, conducted network monitoring and troubleshooting to maintain optimal performance, and assisted in configuring and documenting network devices.

- Supported the management and maintenance of network infrastructure to ensure reliable IT operations.
- Conducted network monitoring, connectivity checks, and troubleshooting to maintain optimal network performance.
- Assisted in configuring and documenting network devices, including routers, switches, and access points.

West Java Provincial Government - Bandung

Jul 2025 - Sep 2025

Web Developer Internship

Regional government agencies that play a role in providing public services and developing digital systems in West Java Province.

- Developed and implemented responsive web application interfaces based on internal service requirements using React and Tailwind CSS.
- Translated UI/UX designs into consistent, user-friendly, and high-performance interfaces, integrating REST APIs for dynamic data handling.
- Collaborated with cross-functional teams to ensure high-quality, functional, and scalable web interfaces.

Education Level

SMA NEGERI SITURAJA - Sumedang

Jun 2019 - Apr 2022

High School Diploma in Situraja State High School, Graduated from Natural Sciences, 89.80/100.00

Universitas Telkom - Bandung

Sep 2022 - Feb 2026

Bachelor of Undergraduate Information Technology, 3.58/4.00

Organisational Experience

Campus Introduction Roadshow Telkom University - Sumedang

Jan 2023 - Feb 2023

STAFF

Conducted roadshows across multiple high schools in Sumedang to introduce Telkom University and increase student interest in higher education.

- Conducted roadshow programs across multiple high schools to introduce Telkom University to prospective students.
- Delivered presentations on university profile, study programs, and campus facilities.
- Explained academic pathways and career prospects aligned with students' interests.
- Engaged with prospective students to increase awareness and interest in higher education.

PKKMB X MEGABIT 6.0 - Bandung (Telkom University)

Jul 2023 - Sep 2023

STAFF Usher

Faculty-organized orientation program designed to help Information Technology students adapt to academic systems and campus environment.

- Supported the execution of orientation events with 200+ participants, ensuring smooth coordination and crowd management.

- Assisted in welcoming and directing new students and guests to ensure a well-organized event experience.
- Maintained order and safety throughout event sessions in collaboration with organizing committees.
- Coordinated participant flow to support efficient and seamless event operations.

EVEREST (Information Technology and Talent Event) Competition - Bandung (Telkom University)

May 2024 - Oct 2024

STAFF Futsal

Integrated event featuring sports, e-sports, and IT competitions designed to develop skills and strengthen collaboration among Information Technology students.

- Coordinated with organizing team to plan match schedules and ensure smooth event flow.
- Managed event logistics, including preparation of futsal equipment and match facilities.
- Supervised match operations to ensure compliance with rules and fair play.
- Facilitated communication between participants and committees to support efficient coordination.

PKKMB X MEGABIT 7.0 - Bandung (Telkom University)

Jul 2024 - Sep 2024

Head of the Usher Division

Faculty-organized orientation program designed to help Information Technology students adapt to academic systems and campus environment.

- Led and coordinated the usher division to ensure smooth execution of orientation events.
- Organized briefings and simulation sessions to prepare team members for operational readiness.
- Collaborated with cross-functional teams to ensure seamless coordination and event success.

Skills, Achievements & Project

- **Soft Skills** (2022): Problem Solving, Teamwork, Communication, Time Management, Adaptability, Critical Thinking
- **Technical Skills** (2023): Programming Languages (JavaScript, Python, C++, Java, Go, Dart, Html, CSS, React, Tailwind CSS, Node.js, Laravel, PHP))
- **Technical Skills** (2023): Tools (Git, GitHub, VS Code, Figma, Cisco Packet Tracer, Microsoft 365 Office)
- **Technical Skills** (2024): Database & API (MySQL, Firebase, REST API)
- **Projects** (2023): Implementation of a simple CRUD (Create, Read, Update, Delete) program in a social media application.
- **Projects** (2024): Redesigned the Microsoft Teams application to enhance user experience by developing a more intuitive and streamlined interface using Figma. Conducted UX research to identify user needs and usability issues, and implemented UI improvements to simplify features and improve collaboration efficiency.
- **Projects** (2024): Redesigned the JKN mobile application using UX research and UI design principles in Figma to enhance usability, accessibility, and overall user experience in accessing healthcare services.
- **Projects** (2024): Developing responsive websites for bootcamps and competitions using HTML, CSS, JavaScript, and AJAX, with a focus on performance optimization, dynamic interactions, and a fast, intuitive user experience (UX).
- **Projects** (2024): Developing a C++-based bootcamp and competition management system by applying Object-Oriented Programming (OOP) concepts such as encapsulation, inheritance, and polymorphism to manage participant data, schedules, and the selection process in a structured and efficient manner.
- **Projects** (2025): Developing a Flutter (Dart)-based mobile app for a bootcamp and competition management system with REST API integration from the web platform, including real-time data processing and the implementation of a responsive UI/UX to ensure optimal performance and user experience.
- **Projects** (2026): Developing an integrated web application for inventory management and work reporting using React framework and JavaScript, featuring an interactive user interface, efficient data management, and performance optimization to enhance user productivity.
- **Achievements** (2025): Published international research indexed by Scopus, titled “ADASYN-XGBoost for Handling an Imbalanced Fish Recommendation Dataset in Fish Pond IoT”
